AN INNOVATIVE APPROACH
TO SANITIZATION
USING PROBIOTICS.

-- FRIENDLY BACTERIA OUTCOMPETING PATHOGENS

An Innovative Approach to Hospital Sanitization Using Probiotics Department of Biomedical Sciences and Morphological and Functional Images, University of Messina, Messina, Italy 2 Postgraduate Medical School in Hygiene and Preventive Medicine, University of Messina, Messina, Italy / La Fauci V et al., J Microb Biochem Technol 2015

INCREDIBLE CONTROL - ECO FRIENDLY PROBIOTIC: OUR ZYME FAMILY OF PROBIOTICS are a proprietary blend of bacteria, spores and enzymes. All natural protection that eats organic soils & forms a protective layer. ✓

Nobody wants flies buzzing around their business – or their meal. Small flies are not only a nuisance, but they can also risk the health of your employees and customers alike.

Risky Business

Flies transmit harmful microorganisms and spread their filth often as they move from surface to surface. As flies move from rotting garbage to exposed food or other surfaces, they regurgitate and leave behind droppings that contain microorganisms like E. coli and Salmonella. Common diseases transmitted by flies include:

- Food poisoning
- Typhoid
- Cholera
- Tuberculosis

Small flies in particular can be especially difficult to control at commercial properties because they breed quickly and lay their eggs in hard to reach areas – LIKE DRAIN PIPES !!!

Defending the Drain

Floor drains can quickly become a breeding ground or passageway into facilities for unwanted pests like small flies. Organic materials, like food and grease, build up in and around drains to produce pungent odors that attract these tiny pests. To prevent drains in your facility from becoming a fly fiasco, try out these fly control products:

- **Multi-Zyme/Odor-Zyme/Bio-Zyme:** Our **PROBIOTICS** break down the organic material found in drains and on surfaces through the use of microbes, spores and enzymes. Formulated to dissolve greasy buildup to reduce fly populations in your facility. **OUR PROBIOTICS - BREAK THE CYCLE AND STOP FLYS DEAD.**

What's Going Down YOUR Drain ??

ELIMINATES ODORS - PATHOGENS BLOCKED - MORE EFFECTIVE - CLINICALLY PROVEN - PREVENTS BIO-FILM - CLEARS DRAINS
